■ LETTER FROM THE FOUNDER

Dear Credo Leadership,

I studied your public presence carefully before writing this proposal — not to sell you a redesign, but to understand what Credo is building.

On **credogroupllc.com**, Credo Energy Group presents itself as a Tanzanian conglomerate advancing sustainable development, innovation, and industrial transformation across Africa. Your publicly listed portfolio spans smart solar cooling, utility metering, renewable infrastructure, EV solutions, drone technology, and an emerging digital & telecom agenda — including CREDO™ TELECOM as an upcoming ISP.

That breadth is rare. It also raises a precise digital question: *does the online experience currently communicate the seriousness of that portfolio to customers, partners, and institutional counterparts?*

From what is visible publicly, there is meaningful opportunity — clearer product storytelling, stronger trust signals, more coherent enquiry paths, and a sustained content rhythm that matches the scale of your ambition.

KasiTech is not proposing a brochure website. We are proposing a **digital operating layer**: systems that strengthen credibility, improve customer experience, and support commercial growth — built to evolve with Credo over years, not weeks.

This document outlines how we would partner with you. Where facts require your confirmation, we have said so plainly. Serious work begins with honest observation.

I look forward to the conversation.

Karen Marie Kasigila

Founder, KasiTech

Technology that helps businesses move faster.

**ENGAGEMENT POSTURE**

Long-term technology partnership.
Not a one-off project sale. Designed
for Credo's multi-vertical growth.

EXECUTIVE SUMMARY

Where Credo stands — and where digital can take you.

WHO CREDO IS

A Tanzanian energy and technology conglomerate publicly positioning itself around sustainable development and industrial transformation across Africa — with product lines spanning solar, smart utilities, EV, drones, and digital infrastructure.

WHERE YOU ARE DIGITALLY

A live WordPress presence at credogroupllc.com presents the portfolio, yet public pages show template residue, inconsistent contact cues, and trust gaps that understate Credo’s commercial seriousness. *(Based on public review, July 2026.)*

WHERE YOU COULD GO

A premium corporate digital system that clarifies each business line, converts serious enquiry, earns partner confidence, and scales into portals, CRM, and smart-city storytelling as Credo expands — pending your strategic priorities.

HOW KASITECH HELPS

We create digital systems that strengthen credibility, improve customer experience, and support business growth — website architecture, content operations, social presence, analytics, and a roadmap for future platforms.

ENGAGEMENT AT A GLANCE

01 • FOUNDATION

Corporate digital system

Premium website, CMS, SEO foundations, analytics, enquiry architecture.

02 • MOMENTUM

Care + social engine

Ongoing site stewardship and a professional social content system.

03 • HORIZON

Platform roadmap

Optional CRM, portals, tender desk, warranty, AI — scoped later.

RECOMMENDED INVESTMENT SNAPSHOT

Website implementation

TZS 7,500,000

Care + Social / month

TZS 2,000,000

Partnership model

Long-term

■ BEFORE / AFTER – CURRENT STATE

What the market experiences today.

Current digital presence

- ✕

Template appearance
WordPress / theme residue that understates institutional ambition.
- ✕

Generic product presentation
Catalogue listed without executive-grade storytelling or vertical depth.
- ✕

Limited trust
Incomplete About content, inconsistent location cues, weak proof signals.
- ✕

Weak enquiry routing
CTAs exist, but form taxonomy and audience paths misalign with energy offering.
- ✕

Minimal storytelling
Portfolio breadth exceeds narrative clarity — partners must work to understand Credo.

What Credo's digital system becomes.

Future digital system

- ✓ **Executive-grade interface**
Quiet confidence. Brand-led hierarchy. Boardroom-ready presentation.
- ✓ **Premium product experience**
Clear taxonomy across AC, utilities, solar, EV, drones, and digital lines.
- ✓ **Institutional trust**
Accurate company story, proof architecture, professional contact facts.
- ✓ **Audience-specific journeys**
Residential, municipal, and distributor paths with the right intake data.
- ✓ **Strong proof architecture**
Project templates ready for Credo-supplied deployments and case narrative.
- ✓ **Modern lead capture • Professional CMS • Executive analytics**
Segmented forms, operator-owned publishing, evidence for leadership decisions.

■ ABOUT KASITECH

A digital transformation partner — not a vendor of pages.

KasiTech is a premium digital technology studio based in Dar es Salaam. We build systems that help ambitious businesses move faster — with clarity, craft, and commercial discipline.

MISSION

Create digital systems that strengthen credibility, improve customer experience, and support durable business growth.

VISION

Become the technology partner African enterprises trust when the stakes are institutional — brand, revenue, and reputation.

CORE PHILOSOPHY

EVIDENCE

Decide from observation — audience behaviour, business goals, and what the market actually needs.

SYSTEMS

Design for continuity: content, enquiry, analytics, and operations — not isolated screens.

CRAFT

Executive-grade interface and messaging. Quiet confidence over decoration.

PARTNERSHIP

Long-term relationships. Roadmaps. Care. The work continues after launch.

What we are

A Digital Transformation Partner for organisations that need technology to carry brand trust and commercial outcomes — websites as systems, social as operating rhythm, platforms as future optionality.

What we are not

We do not measure success by pages delivered. We measure success by whether Credo’s digital presence earns confidence and supports growth — month after month.

“Technology that helps businesses move faster.”

■ UNDERSTANDING CREDO ENERGY GROUP

A multi-vertical energy & technology group — digitally under-articulated.

The following summarises **publicly available** information from credogroupllc.com (reviewed July 2026). Items marked *confirm* require Credo input.

Industry positioning

Public messaging frames Credo as a Tanzanian conglomerate focused on sustainable development, innovation, and industrial transformation across Africa — spanning energy hardware, smart utilities, mobility, aerial systems, and digital infrastructure.

Public contact footprint

Dar es Salaam (Africana) listed in footer · +255 686 882 769 · info@credogroupllc.com. Contacts page also references Melbourne — *confirm official locations*.

PUBLIC PRODUCT LINE	EXAMPLES LISTED ON SITE	DIGITAL IMPLICATION
Smart Solar AC	CREDO™ Solar Breeze, Solar Tower, Solar Force	Spec sheets, B2C/B2B paths
Smart Utilities	Prepaid water/electricity meters; solar water meters; software & analytics	Institutional trust + demos
Solar & Renewables	Benches, streetlights, bus shelters, ATM booths, home kits	Project proof storytelling
EV Solutions	Smart charging stations, portable chargers, roadside kits	Future-mobility narrative
Drone Technology	Agricultural, surveillance, law enforcement, civilian, VTOL	Segmented audience sites
Digital & Telecom	CREDO™ TELECOM (upcoming ISP), satellite, AI & automation, smart city	Platform-ready architecture

TARGET AUDIENCES (RECOMMEND)

Residential & commercial buyers; utilities & municipalities; distributors; security / agri partners; investors. *Confirm mix.*

DIGITAL POSITIONING GAP

Portfolio breadth exceeds current site clarity. Opportunity: one coherent brand system with vertical depth.

GROWTH OPPORTUNITY

Turn public product catalogue into a credibility engine — proof, enquiry quality, partner confidence.

Public-facing audit — observations, not assumptions.

Based on review of credogroupllc.com public pages (Home, About, Products/Projects, Contacts), July 2026. Not a penetration test or private analytics review.

AREA	OBSERVATION	SIGNAL
Website	WordPress / Koral theme stack. Product catalogue present; About page shows incomplete team names and theme marketing copy.	Trust risk
Brand	Dark, minimal public styling; conglomerate tagline repeated. Official brand system not published — <i>confirm guidelines</i> .	Clarify
Navigation	Primary menu covers Home, About, Products, Services, Contacts. Depth for multi-vertical storytelling appears limited.	Structure
SEO	Basic page titles exist; opportunity for structured product/project schema and authority content. Full SEO crawl pending kickoff.	Opportunity
Social	Instagram handle @credoenergygroup_ltd indicated online; depth of content engine and other channels to confirm with Credo.	Confirm
Lead gen	“Order Now” / quote CTAs exist. Contact form service list includes Web Design / Branding — misaligned with energy offering.	Fix now
Trust	Zeroed About statistics; incomplete personnel; Melbourne vs Dar es Salaam inconsistency; copyright typo on footer.	Priority
Performance / All / CTA	Heavy theme/plugin footprint likely; accessibility and CTA hierarchy to be validated in discovery. CTAs present but taxonomy weak.	Discovery

STRENGTHS - Clear conglomerate ambition stated publicly - Broad, distinctive product portfolio listed - Named CREDO™ product lines create brand equity potential - Quote/order intent already present on site	WEAKNESSES - Incomplete About content damages executive trust - Contact inconsistencies (location / form taxonomy) - Multi-vertical IA underdeveloped for portfolio scale - Limited proof / project narrative depth publicly
QUICK WINS - Complete About & team content with approved facts - Align contact form to real Credo services - Reconcile location and contact facts - Fix footer typography / copyright hygiene	LONG-TERM OPPORTUNITIES - Premium IA by vertical + unified brand system - Proof library (projects pending Credo supply) - Social + editorial operating rhythm - Roadmap to CRM / portals / tender desk

■ BUSINESS GOALS

Outcomes that matter to leadership — not vanity metrics.

Recommended digital goals for Credo. Final prioritisation to be confirmed in discovery with your leadership team.

01 Increase trust

Replace ambiguity with authoritative brand presence — accurate company story, proof, and professional presentation for buyers and partners.

02 Generate qualified leads

Route residential, commercial, municipal, and distributor enquiries into clean pathways with the right information captured first time.

03 Improve customer experience

Help visitors understand products quickly, compare options, and take the next step without friction — on mobile first.

04 Strengthen online presence

Align website and social channels into one coherent Credo voice across energy, utilities, mobility, and technology narratives.

05 Improve search visibility

Build technical and content foundations so Credo products and capabilities are discoverable for high-intent searches in priority markets.

06 Improve partner confidence

Give distributors, institutional buyers, and potential collaborators a digital experience that feels boardroom-ready.

07 Support future growth

Architect today's website so tomorrow's CRM, portals, telecom story, and smart-city platforms can land without rebuilding from zero.

SUCCESS DEFINITION (PROPOSED)

Within the first two quarters after launch: higher-quality enquiry volume, reduced bounce on key product paths, consistent monthly content cadence, and leadership confidence that Credo's digital presence matches its portfolio. Baselines to be set in discovery.

RECOMMENDED DIGITAL STRATEGY

Why transformation — not a redesign for its own sake.

Credo’s public portfolio already signals a multi-decade infrastructure story. The digital layer should behave like infrastructure too — durable, scalable, and trusted.

BUSINESS STRATEGY

Centralise brand truth once. Then express each vertical with depth. Buyers should feel they have entered an organised group — not a theme demo with product tabs.

DIGITAL TRANSFORMATION

Move from static pages to an operating system: governed content, measurable journeys, social rhythm, and clean handoff into sales conversations.

SCALABILITY

Information architecture and CMS designed for new product lines (including CREDO™ TELECOM and smart city) without structural rework.

FUTURE-PROOFING

Analytics, modular components, and a documented roadmap toward CRM, portals, and automation when Credo is ready — not before.

DIGITAL ECOSYSTEM — PROPOSED

Strategic principle: Every digital investment should either increase trust, increase qualified demand, or reduce operational friction. If it does none of those, it does not ship.

A premium corporate presence — mobile-first, executive-grade.

Section architecture (homepage)

01 Hero	Brand-led statement + primary CTA
02 Portfolio map	Six verticals, one grid
03 Flagship products	CREDO™ Solar AC spotlight
04 Proof	Projects / partners — <i>Credo-supplied</i>
05 Capability	Utilities · EV · Drones · Digital
06 Enquiry	Segmented lead paths

Experience principles

UX

Clear hierarchy. Minimal cognitive load. Decision paths by audience type.

MOTION

2–3 intentional motions — reveal, focus, progress. Never decorative noise.

MOBILE-FIRST

Designed for field and executive mobile use; desktop as expansion, not afterthought.

ABOUT

Accurate company narrative, leadership (Credo-supplied), and institutional tone — no theme leftovers.

CONTACT ARCHITECTURE

Residential · Commercial · Municipal · Distributor — each path captures the data sales needs.

WEBSITE CONCEPTS

Mobile · Navigation · Product detail · Inquiry flow.

Interaction surfaces that convert field and executive use into qualified commercial conversations.

INTERACTION PRINCIPLE

Every major surface has a clear next action. Mega navigation reduces hunting. Product pages close with enquiry. Inquiry flow captures audience type before free-text — so sales receives structured demand.

Every capability mapped to business value.

Premium corporate site	Executive-grade visual system that signals institutional credibility to buyers and partners.	TRUST
CMS	Credo team updates products, news, and projects without engineering tickets for routine changes.	SPEED
SEO foundations	Technical structure, metadata, and content patterns that support discoverability in priority markets.	DEMAND
Analytics	Visibility into journeys, campaigns, and enquiry sources — so decisions improve with evidence.	INSIGHT
Hosting setup	Production environment configured for reliability and professional email readiness.	RELIABILITY
Professional email	Brand-aligned mailbox setup guidance so correspondence matches Credo's stature.	CREDIBILITY
Project pages	Structured case/project templates ready for Credo-supplied deployments and proof.	PROOF
Products catalogue	Clear product taxonomy across AC, utilities, solar, EV, drones, and digital lines.	CLARITY
News / insights	Editorial surface for announcements and industry perspective — fuels SEO and social.	AUTHORITY
Training	Handover so Credo operators can publish confidently within the system.	OWNERSHIP
Security hygiene	Hardened baseline practices appropriate for a public corporate property.	RISK
Contact systems	Segmented enquiry forms aligned to real Credo services — not theme leftovers.	REVENUE

---	--	---	---	--

■ DELIVERABLES CHECKLIST

Everything included in the website implementation.

All items below are in scope for the TZS 7,500,000 website investment. Care and Social are separate monthly partnerships.

✓ Discovery — stakeholder interviews & asset collection	✓ Strategy — goals, audiences, success metrics
✓ Sitemap — full site map by vertical	✓ IA — information architecture & navigation model
✓ Wireframes — key templates & journeys	✓ UI Design — executive visual system
✓ Responsive — mobile-first across breakpoints	✓ Development — production build
✓ CMS — editable products, projects, news	✓ SEO foundations — structure & metadata
✓ Analytics — journeys & enquiry measurement	✓ Forms — segmented contact / enquiry systems
✓ Training — operator handover	✓ Documentation — operating notes
✓ Deployment — hosting & go-live configuration	✓ Launch — controlled production release
✓ Warranty — 30-day post-launch defect cover	

ALSO COMMENCING WITH PARTNERSHIP

Website Care Plan (TZS 800,000 / month) and Social Media Management (TZS 1,200,000 / month · 16 posts · 8 stories · 2 reels) — billed separately as monthly partnership.

■ EXPECTED BUSINESS OUTCOMES

What leadership should feel — not vanity metrics.

Enquiry quality Residential, municipal, and distributor enquiries arrive with the right context — less triage, faster sales response.	Institutional trust Partners and buyers encounter accurate company story, proof, and professional presentation.	Executive credibility Digital presence matches portfolio seriousness — boardroom-ready, not template-led.
Search visibility Technical and content foundations support discoverability for high-intent product searches.	Conversion clarity Visitors understand products faster and take the next step without friction.	Future expansion Architecture ready for CRM, portals, telecom narrative, and smart-city platforms.
Customer understanding Analytics reveal which journeys and verticals drive serious interest.	Distributor confidence Partners see an organised group system — clearer paths to collaboration.	Content publishing Credo operators publish products, projects, and news without engineering dependency.

WHY NOW

The portfolio is moving — the digital layer should keep pace.

01

Growing portfolio

Public product breadth already spans cooling, utilities, renewables, EV, drones, and digital — clarity compounds with each new line.

02

Telecom initiative

CREDO™ TELECOM as an upcoming ISP needs a platform narrative — not a bolted-on page later.

03

Infrastructure expansion

Field deployments and municipal work demand proof architecture and institutional tone online.

04

Institutional positioning

Distributors, utilities, and capital conversations expect boardroom-ready digital presence.

05

Digital maturity

Public audit shows fixable trust and routing gaps — address them before they harden into reputation cost.

06

Future platform readiness

Build the foundation once — so CRM, portals, and smart-city systems land without a rebuild.

RISK REDUCTION

How we keep delivery controlled and outcomes protected.

DISCOVERY Listen before build Stakeholder interviews, asset collection, and priority confirmation — so scope matches reality.	APPROVAL GATES Credo signs at key stages Sitemap, design system, and pre-launch content — no silent progression past decision points.	WEEKLY REVIEWS Visible status Scheduled progress reviews — blockers, decisions, and next actions documented.
QA Quality discipline Structured quality passes on templates, content hygiene, and enquiry paths.	TESTING Device & journey proof Cross-device validation and critical path testing before go-live.	TRAINING Operator readiness Handover so Credo can publish without dependency on KasiTech for routine updates.
WARRANTY 30-day defect cover Post-launch warranty for implemented scope — excludes third-party outages and unapproved changes.	CONTROLLED LAUNCH No chaotic go-live Checklist-driven release — DNS, forms, analytics, and backups verified.	SUPPORT Care Plan rhythm Ongoing monitoring, minor content support, and monthly health notes after launch.

GOVERNANCE

Clear ownership — so decisions move without ambiguity.

ELEMENT	HOW IT WORKS
Stakeholders	Credo leadership + nominated operators; KasiTech founder + delivery lead. Named list locked at kickoff.
Decision makers	Credo designates one primary approver for design and content. Secondary reviewers optional but time-boxed.
Approval gates	Sitemap · Design system / key templates · Pre-launch content pack · Go-live checklist.
Weekly meetings	Standing progress call during implementation — status, blockers, decisions required.
Monthly executive reviews	After launch (Care + Social): performance note, content cadence, recommendations, priority alignment.
Escalation path	Delivery lead → Founder (KasiTech) ↔ Credo primary approver → Credo executive sponsor for commercial or scope conflicts.

COMMUNICATION STANDARD

Written decisions preferred. Meeting notes shared within one business day. Open questions tracked until closed.

PRIMARY KASITECH CONTACT

Karen Marie Kasigila · karen@kasitechinnovations.com · +1 269 861 3487

SUCCESS METRICS

How we will know the system is working.

Baselines established in discovery. Targets confirmed with Credo leadership — not invented vanity numbers.

Qualified enquiries	Volume and quality of segmented form submissions by audience type	MONTHLY
Bounce rate	Engagement health on homepage and key product entry paths	MONTHLY
Conversion	Visit-to-enquiry rate on priority verticals	MONTHLY
SEO visibility	Indexing health, key page presence, structured content growth	QUARTERLY
Product engagement	Depth of visits on product and project templates	MONTHLY
Time on site	Signal of comprehension on catalogue and proof pages	MONTHLY
Lead routing	Share of enquiries correctly tagged by audience path	MONTHLY
Editorial cadence	Social plan delivery: 16 posts · 8 stories · 2 reels	MONTHLY
Content publishing	Credo-operated CMS updates (products, projects, news)	MONTHLY

■ IMPLEMENTATION – EXECUTIVE ROADMAP

A disciplined path from discovery to continuous improvement.

Indicative roadmap for the website foundation. Exact dates locked at kickoff. Social management runs in parallel from Planning onward.

Clear commercial terms — no ambiguity.

WEBSITE IMPLEMENTATION

TZS 7,500,000

One-time implementation for the premium corporate digital system described in this proposal.

Included in website implementation

EVERYTHING BELOW IS IN SCOPE

Premium corporate website	Executive visual system, responsive templates, core pages
CMS	Editable products, projects, news, and key pages
SEO foundations	Structure, metadata patterns, indexing readiness
Analytics	Measurement setup for journeys and enquiries
Hosting setup	Production configuration for launch
Professional email setup	Guidance and configuration support for brand mail
Project & product modules	Templates for projects, products, and news
Training · Security · Contact systems	Operator handover, baseline hardening, segmented forms

WEBSITE CARE PLAN

TZS 800,000 / month

Updates, monitoring, minor content support, security hygiene, performance watch, and a monthly health note — so the system stays sharp after launch.

SOCIAL MEDIA MANAGEMENT

TZS 1,200,000 / month

16 custom posts · 8 stories · 2 reels · monthly strategy · community management · scheduling · captions · hashtags · reporting · calendar · professional design.

TOTAL MONTHLY PARTNERSHIP

Care Plan + Social Media Management

TZS 2,000,000

OPTIONAL FUTURE ENHANCEMENTS

Not included today — designed so they can be.

These capabilities are **out of scope** for the current investment. They form a recommended growth roadmap once the foundation is live and priorities are confirmed with Credo.

WHY KASITECH

Differentiation that shows up in delivery — not philosophy.

Commercial Catalog

Structured product & service packaging that maps to real quotes.

Demo Studio

Interactive concepts leadership can scan and critique before build.

Proposal System

Executive documentation with commercial discipline and config sync.

Structured Pricing

Clear one-time and monthly lines — no opaque bundles.

Executive Documentation

Boardroom-ready proposals, roadmaps, and governance — not slide fluff.

Long-term Partnership

Care and Social as operating relationships, not abandoned handoffs.

CMS-first Architecture

Credo owns publishing from day one of training.

Future-ready Systems

Foundation assumes CRM, portals, and telecom narrative later.

Evidence-based Decisions

Analytics and audits drive priorities — observation before invention.

COMMERCIAL ECOSYSTEM

TERMS

Commercial terms of engagement.

Payment schedule

40%	On acceptance — discovery & design commence
40%	On design approval — development commence
20%	On launch readiness — prior to go-live
Monthly	Care & Social billed in advance each month

Project scope

Scope is defined by this proposal and the kickoff brief. New verticals, languages, custom integrations, or portal work are change-requested and priced separately.

Revision policy

Two consolidated revision rounds included at design stage; one at pre-launch content. Additional rounds billed at agreed hourly or fixed addendum.

Support

Care Plan clients receive prioritized response during business hours (EAT). Emergency severity definitions agreed at kickoff.

Ownership

Upon full payment, Credo owns final delivered website content and Credo-specific design assets. KasiTech retains underlying methodologies, component libraries, and non-client-specific tools.

Warranty

30-day post-launch defect warranty for implemented scope (excluding third-party outages, client content errors, or unapproved modifications).

Cancellation

Either party may end monthly Care/Social with 30 days' written notice. Implementation fees for completed phases remain due. Work product for paid phases is delivered.

VALIDITY

This proposal is valid for 30 days from 30 July 2026. Pricing assumes the scope described herein. A formal agreement / statement of work will confirm legal terms mutually.

■ ACCEPTANCE

Authorization to proceed.

By signing below, Credo Energy Group authorizes KasiTech to commence the Digital Transformation engagement described in proposal **KT-CEG-2026-001**, subject to a mutually executed agreement.
