

KasiTech Master Product & Implementation Audit

Status: Phase 0 audit only — no implementation started
Source catalog: KasiTech_Publish_Ready_Services_Pricing_Catalog_2026_v2.docx
Target Price Book: KT-PB-2026.1
Exported: 2026-07-29
Canvas origin: master-commercial-os-audit.canvas.tsx

STOP — awaiting administrator review. Several commercial rules cannot be engineered without guessing. Resolve Admin Flags before authorizing Phase 1.

1. Overview

Key metrics

Metric	Value
Catalog line items extracted	149
ONE_TIME priced SKUs	110
Admin flags (do not guess)	24+
DB / auth / PDF / CRM today	0

Repository verdict

KasiTech today is a polished **Next.js 16** marketing site + **12 client-side concept demos** + a static TSh catalog at `/pricing`. It is **not** a commercial operating system. The Master Spec requires one Price Book powering Catalog → Demo Studio → Quote → SOW → Agreement → Invoice → Project → Care. That infrastructure does not exist yet.

What exists

- Next 16.2 / React 19 / Tailwind 4 · App Router
- Brand system: black / ivory / #c7ff00 · Outfit + Space Grotesk + JetBrains Mono
- `/pricing` from `src/data/catalog.ts` (~140 price fields, static)
- 12 demos under `/demo/*` (Zuri, Moto, Noir, Soko, Nest, Afya, Amani, Atlas, Nuru, Impact, Kasi Flow, Intelligence)
- Lead path: `/start` → localStorage + FormSubmit + optional Resend/Formsprees + WhatsApp
- Deployed on Vercel · kasitechinnovations.com

What does not exist

- Database, Prisma/Drizzle, migrations
- Auth / roles (PUBLIC · CLIENT · STAFF · ADMIN)
- Canonical Price Book engine + versioning + snapshots
- `/demo-studio` configurator (catalog §21 destination)
- Quotes, SOW, agreements, invoices, receipts, change requests
- PDF generation (catalog print CSS only)
- Internal OS, client portal, payments, care tracking
- Automated tests / CI

Catalog coverage confirmation

Every customer-facing priced item from the approved catalog is inventoried: **149 line items** across websites, features, booking, payments, commerce, languages, 7 industry groups, 8 bundles, SEO/local, social/ads, branding, KasiTech Business, custom solutions, care, hosting, delivery, and discovery. Policy sections (§13–§22) are mapped as commercial rules / document modules — not invented SKUs.

Existing /pricing vs Word source

Area	Status
Core priced packages / features / industries / bundles	Ported in catalog.ts — good price fidelity
Package comparison matrix + delivery windows	Present on /pricing
Payment schedule tiers (§13)	Present
Hosting/domain/SSL policy table (§17)	Partial — email priced; domain/hosting prose incomplete
Content population limits (§17)	Not structured as engine rules yet
Warranty / handover matrix (§18)	Condensed in terms highlights
Social scope definitions (§19)	Missing from web catalog
Demo Studio destination /demo-studio (§21)	Not built — demos are separate /demo/*
Contact placeholders in Word §22	Site has real social/WhatsApp; business email still personal iCloud

2. Price Book Inventory (KT-PB-2026.1)

Proposed service codes are **provisional** naming for the Price Book schema. Prices match the approved catalog exactly. Codes themselves need admin approval before freeze.

Code	Name	Category	Price (TSh)	Billing
WEB-ONE	One Page	Websites	500,000	ONE_TIME
WEB-ESS	Essential	Websites	900,000	ONE_TIME

Not separate SKUs (commercial rules / entitlements)

Website baseline inclusions · package comparison capabilities · payment schedule bands · revision rounds · 30-day warranty · content population limits · social scope definitions · tax treatment · pause/reactivation language · cancellation (agreement-governed). These become rule engines + document modules, not inventable prices.

3. Matrices

Package matrix

Capability	One Page	Essential	Business	Business+	Professional	Signature
Price	500k	900k	1.5M	2.25M	3.25M	4.5M
Delivery	7–10d	2–3w	3–4w	4–6w	6–8w	8–10w
Pages	1	≤5	≤10	≤15	≤20	Bespoke
CMS	—	Selected	✓	✓	✓	✓
Blog / News	Add-on	Add-on	✓	✓	✓	✓
Portfolio	Add-on	Add-on	✓	✓	✓	✓
Case / Team / Resources	Add-on	Add-on	Add-on	✓	✓	✓

SEO level	Basic	Basic	Enhanced	Technical	Technical	Advanced
UX/UI	Focused	Standard	Enhanced	Advanced	Advanced	Bespoke
Premium interactions	—	—	—	Selected	Selected	✓

Bundle matrix

Bundle	Price	Mapped components	Mapped sum	Implied savings	Unmapped inclusions
Business Launch	1,250,000	Essential + GBP + Email	1,200,000	Cannot compute	enhanced SEO · analytics

Beauty & Booking	1,050,000	One Page + Ext Booking + GBP	900,000	Cannot compute	gallery · social integration
Restaurant	1,850,000	Essential + Digital Menu + Reservations + GBP	1,950,000	~100,000 (if gallery free)	gallery
Online Store	2,850,000	Essential + Starter Store + Std Payment	2,900,000	50,000	—
Tourism	2,850,000	Business + Tour Cat + Itinerary + Inquiry	2,500,000	Cannot compute	enhanced SEO
Real Estate	2,650,000	Business + Listings + Filters + Inquiry	2,850,000	200,000	—
Professional Presence	3,750,000	Professional + Pro SEO Setup + GBP	4,150,000	400,000	—
Digital Growth	2,250,000 /mo	Social Pro + SEO Growth	1,650,000 /mo	Cannot compute	website care/content allowance

Warning: Bundle savings cannot be auto-detected for 4 of 8 bundles until unmapped inclusions are mapped to SKUs (or given explicit zero-price entitlement codes).

Care plan matrix

Plan	Price	Period	Catalog inclusions (exact text)
Essential Care	180,000	year	Small/static site · SSL monitoring · technical checks
Standard Care	300,000	year	Small-business maintenance · backups · technical checks
Business Care	600,000	year	Maintenance · backups · monitoring · defined minor content updates
Professional Care	150,000	month	Routine support · maintenance · defined content updates
Priority Care	300,000	month	Priority support · monitoring · backups · analytics checks · content support
No Care Plan	—	—	Allowed; hosting/third-party must remain active for site to stay online

Catalog does not quantify update hours, SLA response times, or backup frequency. Comparison UI must not invent entitlements.

KasiTech Business plan matrix

Plan	Price / month	Users	Locations	Catalog modules
Launch	150,000	1	1	Website editor · basic analytics
Growth	400,000	≤5	—	Customer DB · bookings · events · QR · standard analytics
Pro	800,000	≤10	2	Advanced analytics · expanded workflows
Scale	1,500,000	≤25	5	Advanced operations
Enterprise	Custom	Custom	Custom	Custom users, locations, integrations, workflows

Industry → feature priority (Demo Studio)

Industry	Catalog features (priced)	Demo Studio §21 listed?	Existing /demo
----------	---------------------------	-------------------------	----------------

Beauty & Wellness	Uses One Page + Ext Booking + gallery (bundle)	Yes	/demo/noir (events — closest)
Restaurant	Menu, Reservations, Ordering, Multi-branch, QR	Yes	/demo/moto
Tourism	Catalogue, Itinerary, Inquiry, Booking, Builder	Yes	/demo/zuri
Real Estate	Listings, Filters, Agents, Inquiry, Map	Yes	/demo/nest
Retail / E-commerce	Stores + payments	Yes	/demo/soko
Professional Services	General website features	Yes	/demo/amani
Education	Admissions, Faculty, Courses, Portals, Fees	Yes (Education/NGO)	/demo/nuru
NGO	Programs, Donations, Publications, Volunteer, Donor portal	Yes (Education/NGO)	/demo/impact
Healthcare	Directory, Appointments, Forms, Portal, Teleconsult	NO in §21 list	/demo/afya
Logistics	Quote, Inquiry, Tracking, API, Portal	NO in §21 list	/demo/atlas
General Business	Website packages + add-ons	Yes	—
Hospitality / Hotel	Hotel booking integration / custom	Not named (under Tourism?)	/demo/zuri

Feature dependency matrix (proposed — needs approval)

Danger: Catalog does not define formal dependency rules. Below are engineering proposals inferred from product sense — NOT approved commercial rules.

If client selects...	Proposed requires...	Status
Any store / industry module	Website package (or bundle that includes one)	Catalog implies — FLAG confirm
Deposit / Recurring / Donation payments	Standard Payment Integration?	NOT stated — FLAG
Multi-staff Booking	Appointment Booking?	NOT stated — FLAG
Advanced Menu	Digital Menu?	NOT stated — FLAG
Business Store / Advanced Store	Not Starter — mutually exclusive tiers?	NOT stated — FLAG
Tour Booking	Tour Catalogue?	NOT stated — FLAG
Live Tracking API	Tracking Interface?	NOT stated — FLAG
Parent/Student/Donor/Patient portals	Website foundation + auth/security scoping	Sensitive-data note only
Delivery surcharge	One-time project fee base	Stated (§16)
Package-included feature	Do not charge again	Stated (§02)

Document data mapping

Document	Primary data sources	Must snapshot
Catalog PDF	Active Price Book	Price Book version
Project Estimate	Configuration + Price Book + delivery calc	Full commercial snapshot
Formal Quote	Client + Config snapshot + schedule + tax	Yes — immutable
SOW	Quote line items → sowLanguage / acceptanceCriteria	Yes — matches quote
Agreement	Client legal + quote/SOW refs + legal modules	Template version + commercial refs
Invoice	Approved payment milestone from schedule	Yes — amounts frozen
Receipt	Payment record + invoice balance	Yes
Change Request	Delta vs accepted scope + new totals	Yes
Approval Certificate	Approval event + project version	Yes

Commercial lifecycle

PUBLIC_CONFIG → ESTIMATE → LEAD → INTERNAL_REVIEW → FORMAL_QUOTE → ACCEPTED_QUOTE → SOW → AGREEMENT → CONTRACTED → INVOICE → PAYMENT → ACTIVE_PROJECT

Document states: DRAFT · READY_FOR_REVIEW · SENT · VIEWED · ACCEPTED · SUPERSEDED · CANCELLED

Project lifecycle

READY_TO_START · WAITING_FOR_CLIENT · ACTIVE · AWAITING_CLIENT · ON_HOLD · LAUNCHED · WARRANTY · CARE · COMPLETED · CANCELLED

Approval gates: DESIGN · DEVELOPMENT · FINAL_ACCEPTANCE . Post-approval scope change → Change Request.

4. Administrator Flags — Do Not Guess

A. Bundle composition & savings (blocking)

ID	Issue	Why it blocks
F01	Business Launch includes 'enhanced SEO' — not a SKU	Cannot compute standalone value or auto-detect eligibility
F02	Beauty & Booking includes 'gallery' and 'social integration' — not SKUs	Same — savings math incomplete
F03	Restaurant / Beauty bundles include 'gallery' — not SKUs	Need zero-price entitlement codes or map to a feature
F04	Tourism bundle includes 'enhanced SEO' — not a SKU	Same as F01
F05	Digital Growth: 'website care/content within allowance'	Which care plan? What quantitative allowance?
F06	4 of 8 bundles cannot show approved savings without F01–F05	APPLY BUNDLE UI incomplete

B. Duplicate / overlapping line items

Pair	Both priced	Question
------	-------------	----------

BKG-REST vs REST-RSV (Reservations)	600,000 each	Same service listed twice, or distinct?
BKG-TOUR vs TOUR-BKG (Tour Booking)	900,000 each	Alias or separate?
BKG-APT vs HLTH-APT (Appointments)	650,000 each	Industry alias of Appointment Booking?
PAY-DON vs NGO-DON (Donations)	500,000 each	Payment module vs NGO feature?
ADD-LAND vs ADS-LAND (Landing page)	250,000 each	Same SKU under two categories?
EDU-FEE 750k vs PAY-REC 750k	Same price	Fee Payments include Recurring Payments or additive?

C. Missing dependency / exclusivity rules

ID	Gap
F10	Does any e-commerce/industry feature require a minimum website package?
F11	Are store tiers mutually exclusive?
F12	Do Deposit/Recurring/Donation require Standard Payment Integration?
F13	Does Multi-staff require Appointment Booking?
F14	Does Advanced Menu require Digital Menu?
F15	SEO Care/Growth/Authority exclusivity vs stacking?
F16	Social plan exclusivity vs stacking?
F17	Care plans exclusivity (one only)?
F18	KasiTech Business plans exclusivity?

D. Timeline & delivery

ID	Gap
F20	Delivery windows stated for website packages only — how do add-ons/industry modules extend timeline?
F21	How is 'standard project fee' defined for surcharge when mix of one-time + monthly?
F22	Business-day calendar / timezone for completion date calculation?
F23	Which configurations are ineligible for Rush/Emergency (API/payment-provider deps)?

E. Care / KB entitlements

ID	Gap
F30	No quantitative content-update hours for any care plan
F31	No SLA response times except word 'Priority'
F32	Hosting 'included only where stated in care plan' — which plans include hosting?
F33	KB Growth 'bookings · events · QR' — map to which website/booking SKUs for demo unlock?
F34	KB Pro/Scale 'expanded workflows / advanced operations' — undefined module list

F. Legal / tax / commercial

ID	Gap
F40	No approved CSA / SOW / quote legal templates supplied yet
F41	Tax: catalog says prices before tax if legally required — is KasiTech VAT-registered? Rate?
F42	Cancellation/refunds: agreement-governed — need approved modules
F43	Project pause/reactivation rules referenced but not numerically defined in catalog
F44	Discount types beyond published bundles not defined (referral/strategic/discretionary caps)
F45	Ads management 15% over spend threshold — of media spend, billed how/when?

G. Demo Studio scope

ID	Gap
F50	§21 Demo Studio industries omit Healthcare & Logistics despite priced features + existing demos
F51	No dedicated Beauty/Salon demo — Noir is nightlife/events
F52	Gallery / social integration lack SKUs but appear in Demo Studio expectations
F53	Implementation task templates for ALL services — none exist in catalog (must be authored, not invented as commercial)

5. Proposed Architecture

Three experiences

Surface	Role
A • Public Catalog /pricing	Search, filter, compare, add-to-build, downloadable PDF from Price Book
B • Public Demo Studio /demo-studio	Industry schemas + feature toggles driven by Price Book IDs; reuse /demo/* as content packs
C • Private KasiTech OS /app	CRM, configurator, documents, finance, delivery, care. Generate ≠ authorize

Canonical engines

Engine	Responsibility
Price Book	Versioned SKUs KT-PB-YYYY.N — sole price source
Configuration	Industry + package/bundle + features + care + KB + delivery
Compatibility	Dependencies, incompatibilities, package inclusions, no double charge
Bundle	Exact bundle price, savings vs mapped SKUs, eligibility detection
Pricing	Integer TSh totals: one-time / monthly / annual / third-party / first-12
Timeline	Base window + add-on impact (after F20) + delivery surcharge dates
Snapshot	Immutable commercial JSON on every issued document
Preflight	Block issue until validation checklist passes
Numbering	Transactional KT-Q / SOW / AGR / INV / RCP / CR sequences

Audit	Append-only event log for commercial & security events
-------	--

Proposed database (Postgres)

Suggested stack: Vercel + Neon/Supabase Postgres + Drizzle ORM + Auth.js (or Clerk) · object storage for PDFs · Resend for email. Exact vendor choice is an admin decision.

Domain	Core tables
Price Book	price_books, services, service_versions, package_inclusions, bundles, bundle_items, dependencies
CRM	companies, contacts, leads, opportunities, activities
Config	configurations, configuration_items, configuration_snapshots, build_comparisons
Commercial	estimates, quotes, sows, agreements, invoices, payments, receipts, change_requests, discounts
Delivery	projects, tasks, task_templates, approvals, readiness_items, assets, credentials_vault
Care	care_subscriptions, entitlements_usage, warranties, renewals, support_tickets
System	users, roles, audit_events, document_numbers, legal_templates

Migration strategy (do not break the site)

Step	Approach
1	Keep existing marketing routes untouched initially
2	Introduce packages/price-book + packages/pricing-engine as new modules
3	Migrate src/data/catalog.ts → generated from Price Book seed (single source)
4	Add /demo-studio beside existing /demo/*; gradually wrap demos as content packs
5	Add /app/* behind auth; SiteChrome already excludes /demo — extend for /app
6	Replace FormSubmit lead path with DB leads after Phase 5; keep WhatsApp as channel
7	Feature flags for public catalog redesign vs current /pricing
8	No rewrite of working demos required for Phase 1–2

Security review (proposed)

Area	Control
AuthZ	Server-side RBAC — PUBLIC / CLIENT / STAFF / ADMIN — never UI-only
Documents	Signed URLs · role checks · no regenerate-from-live-prices
Credentials	Encrypted vault · no secrets in PDFs · prefer delegated provider access
Money	Integer minor units (TSh) · deterministic calc · no LLM math
Audit	Immutable append log for price/book/document/payment/credential events
PII	Least privilege · MFA for staff · separate client portal tenancy
Internal costing	Never exposed on public or client APIs

Testing strategy

Golden configs with known totals · unit tests for every pricing rule · snapshot tests for issued documents · e2e public journey · e2e internal pack · e2e project/CR/launch. A pricing change is incomplete until financial tests pass.

6. Implementation Phases

Phase	Scope	Gate
0	This audit	YOU ARE HERE — awaiting approval + flag answers
1	Price Book · schema · migrate all SKUs · engines · financial tests	Flags F01–F45 resolved or explicitly deferred with blocked features
2	Public catalog redesign · search/filter/compare · catalog PDF	Price Book frozen KT-PB-2026.1
3	Demo Studio · industries · toggles · bundles · care · KB preview · summary	Dependency rules approved
4	Save/share/compare · estimate PDF · Submit → Lead	Snapshot format locked
5	Internal CRM · clients · sales configurator (mobile-first)	Auth live
6	Quote · SOW · Agreement · Invoice · numbering · preflight	Legal templates approved
7	Payments · receipts · approvals · CRs · auto project/tasks	Payment schedule rules confirmed
8	Client portal · care · support · warranty · renewals	Portal MVP scope signed off
9	Analytics · internal costing · audit hardening · a11y · e2e QA	Definition of success checklist

Recommended immediate decisions

1. Approve or amend provisional service codes (WEB-ONE, etc.).
2. Resolve bundle unmapped inclusions (F01–F05) — map to SKUs or create entitlement codes at TSh 0.
3. Confirm duplicate pairs (Reservations, Tour Booking, Appointments, Donations, Landing Page).
4. Supply or authorize drafting of dependency rules (F10–F18).
5. Confirm Demo Studio industries include Healthcare + Logistics.
6. Confirm tax posture and approve legal template authorship process.
7. Choose DB/auth vendors (recommendation: Postgres + Auth.js or Clerk on Vercel).
8. Explicitly authorize Phase 1 start after flags are answered.

Coverage statement

Every customer-facing priced service, package, bundle, care plan, KasiTech Business plan, delivery surcharge, and custom-quote category in the approved 2026 v2 catalog has been accounted for in the inventory. Policy sections are accounted for as rules/modules. Items that cannot be implemented without guessing are flagged — not invented.

No major implementation begun. Authorize Phase 1 only after reviewing flags.
