

KasiTech Master Commercial OS Audit — Phase 0 Rev 1.1

Status: Preliminary audit accepted · Phase 1 NOT authorized
Revision: 1.1 — administrator decisions applied (30 Jul 2026)
Exported: 2026-07-30
Price Book target: KT-PB-2026.1
Source catalog: KasiTech_Publish_Ready_Services_Pricing_Catalog_2026_v2.docx

Phase 1 blockers ONLY

Five decisions remain. Everything else is resolved, deferred past Phase 1, or represented as nullable/unresolved metadata.

ID	Decision required	Why Phase 1 needs it	Safe interim if deferred in writing
P1-A	When PAY-DEP / PAY-REC / PAY-DON / EDU-FEE is selected, is the commercial charge ONLY that SKU, or must PAY-STD also be charged?	Payment charge-record generation	Charge selected payment SKU only; never auto-add PAY-STD; preflight WARNING until answered
P1-B	Upgrade commercial relationships: BKG-STAFF↔BKG-APT, REST-AMENU↔REST-MENU, optionally LOG-API↔LOG-TRACK — charge higher only, both, or replacement delta?	Correct configurator totals	commercialRule=PENDING; refuse final estimate if both would be charged until approved
P1-C	Approve provisional codes (WEB-ONE, BKG-REST, ENT-GALLERY, ...) or supply final coding scheme	Stable IDs for seed + golden tests	Codes can migrate later; freeze preferred
P1-D	Digital Growth: define ENT-CARE-CONTENT-TBD or confirm free-text inclusion without entitlement code	BND-GROW composition	Free-text catalog inclusion; no savings UI; no invented care SKU
P1-E	EDU-FEE vs PAY-REC (both 750k): alias, replacement, or additive?	Education double-charge risk	Treat distinct; never auto-add PAY-REC with EDU-FEE

Explicitly NOT Phase 1 blockers

Topic	Disposition
Industry duplicate SKUs	Resolved → SERVICE_ALIAS
Exclusive tier families	Resolved
Demo Studio industries + Beauty schema	Resolved (Phase 3 build)
Invented entitlement prices / false savings	Resolved — forbidden
timelineImpact invention	Resolved — nullable; matrix later
Care hours / SLA / backup / hosting inclusion	Deferred — catalog text only
KB expanded workflows / advanced ops	Deferred — undefined modules flagged
VAT / cancellation / refunds / legal clauses	Deferred — document phases
Auth / Clerk / Auth.js	Deferred — schema-ready only
Ads 15% overspend billing mechanics	Deferred — store rule text

Administrator decisions applied

#	Decision	Effect
1	Industry duplicates → aliases	One commercial charge; presentation via SERVICE_ALIAS
2	Mutually exclusive tier families	Store / SEO recurring / Social / Care / KB — one active
3	Demo Studio industries expanded	Beauty schema required; Healthcare & Logistics included; no Noir→salon
4	Non-sellable ENTITLEMENT	No invented prices; savings only from approved standalone SKUs
5	Payment modules not auto-stacked	Technical deps ≠ automatic commercial charges
6	Upgrade vs additive flagged	Technical dependency separate from commercial charge
7	Next 16 + Supabase + Drizzle	No Clerk/Auth.js in Phase 1; schema auth-compatible
8	timelineImpact nullable	Package windows only; no invented feature impacts
9	Care SLAs/hours not invented	Unresolved admin entitlements
10	KB vague modules not invented	Only explicit catalog modules
11	Legal/tax deferred	Not Phase 1 blockers
12–13	Typed objects + charge records	UI selection ≠ automatic charge

Pricing principle

Commercial **charge records**, not UI selections. Aliases never create a second charge. Entitlements never invent prices. Technical dependencies do not auto-add line items.
